A STUDY ON EMPLOYEE SATISFACTION TOWARDS COMPENSATION BENEFITS IN AU SMALL FINANCE

Ms, Anusiya, V, II MSW Student, Department of Social Work, Patrician College of Arts & Science

Ms. Leanne Maria,

Assistant Professor, Department of Social Work, Patrician College of Arts & Science

ABSTRACT

This study investigates employee satisfaction with compensation benefits, exploring how various factors influence perceptions of fairness and value. Through surveys and interviews, the research examines key elements such as salary, bonuses, health benefits, and retirement plans. Findings indicate that transparent communication, equitable reward systems, and alignment with employee needs significantly enhance satisfaction. Additionally, personalized benefits tailored to individual preferences further improve contentment. The study highlights the importance of a well-structured compensation strategy in fostering a positive work environment, increasing motivation, and reducing turnover. Recommendations are provided for organizations to optimize their compensation practices to boost overall employee satisfaction.

INTRODUCTION

COMPENSATION

The term compensation represents the exchange between employees and organization, both giving something in return for something else. In the past, the compensation issues were often confidential and governed by individual employer's preferences and choices. (Bhattacharyya 2009).

According to Cascio (1995) the "Compensation includes direct cash payments and indirect payments in form of employee benefits and incentives to motivate employees to strive for higher levels of productivity".

OBJECTIVES OF COMPENSATION

Equity

Efficiency

Macroeconomic Stability

Efficient Allocation of Labor

Motivating the Employees

Acquired Qualified Employees

Retain Current Employees

Reward Desired Behavior

Control Cost

A STUDY ON CHALLENGES FACED BY CONTRACT EMPLOYEES IN DIFFERENT SETTINGS

Mr. Aswin Raj, Il MSW, PG Department of Social Work, Patrician College of Arts & Science Dr. Usha Jose, Associate Professor, Department of Social Work, Patrician College of Arts & Science Mr. Dominic, Assistant Professor, Department of Social Work, Patrician College of Arts & Science

ABSTRACT

This study focuses on challenges faced by temporary and contact employees. There are different struggles like physical and psychological problems due to the temporary employment individuals are exploited. Researcher used descriptive study design and Purposive sampling to collect data Attitude towards temporary employees by the employer has a major difference which can be changed for social wellbeing of the employees researcher worked alongside with contract employees to understand their perspectives. Researcher found that psychological distress created to employees in contract positions is high through the study. Also the partiality shown in a working environment is at peak. To conclude, study with suggestions of fair wages with partiality in work can be reduced and appreciation for small works will help their psychological well being. And proper grievance cell to address their problems.

Keywords Contract workers, Fair wages, Physical problem, Psychological problem

INTRODUCTION

A contract employee is an employee a company hires to complete a specific task or project during a predetermined time frame and with a fixed fee. Contract employees are typically experts that provide a set of skills or subject matter experience that is unavailable within the organization's internal employee. Studying the challenges faced by contract employees is essential as it provides insights into the dynamic and evolving nature of the modern workforce. Contract employment, also known as contingent or gig work, has become increasingly prevalent in today's global economy.

Understanding the challenges encountered by contract employees is crucial for several reasons, ranging from social and economic perspectives to the formulation of effective labor policies. In this comprehensive exploration, we will delve into the multifaceted aspects of contract employment challenges, covering economic instability, job insecurity, lack of benefits, limited career development opportunities, and the broader societal implications.

ECONOMIC INSTABILITY

Contract employees often face economic uncertainty due to the unpredictable nature of their employment. Unlike permanent positions, contract contracts are subject to abrupt termination, leaving workers in a perpetual state of financial instability. This insecurity can have profound effects on various aspects of their lives, including housing, healthcare, and overall well-being. Studying these economic challenges is crucial for understanding the broader implications of contract employment on individuals and society.

JOB INSECURITY

Contract employees typically lack job security, facing the constant threat of contract non-renewal or sudden termination. The fear of job loss can impact their performance, mental health, and job satisfaction. Exploring the causes and consequences of job insecurity among contract workers provides valuable insights into the psychological toll of such employment arrangements.

A STUDY ON PSYCHOLOGICAL WELL-BEING AMONG HOMEMAKERS IN KOTTAYAM, KERALA

Ms. Gifty Jacob, II MSW, Department of Social Work, Patrician College of Arts & Science

Mr. Abraham Matthew, Assistant Professor, Department of Social Work, Patrician College of Arts & Science

ARSTRACT

This study investigates the psychological well-being of homemakers in Kottayam, Kerala, shedding light on their sociodemographic profiles and the correlations between various dimensions of psychological well-being. Through a descriptive research design, 80 homemakers aged between 22 and 65 were surveyed using a standardized questionnaire. Findings reveal that the majority of respondents belong to the middle age group of 37-50 years, with prevalent nuclear family structures and lower family incomes. Significant correlations were observed between psychological well-being and factors such as literacy, family structure, and income level. Specifically, autonomy and environmental mastery emerged as key dimensions positively correlated with overall well-being. The study underscores the importance of addressing socio-economic disparities and promoting autonomy-enhancing measures to enhance psychological well-being among homemakers. These findings contribute valuable insights for policymakers, practitioners, and researchers aiming to develop targeted interventions and support systems to improve the quality of life for homemakers in Kottayam, Kerala.

Keywords: Psychological well-being, homemakers, women, kerala.

INTRODUCTION

The study examines the psychological well-being of homemakers in Kerala, aiming to understand the various factors influencing their mental health and overall satisfaction. Psychological well-being refers to a person's overall state of mental health and emotional functioning. Factors contributing to psychological well-being include a sense of purpose, autonomy, positive relationships, a sense of mastery or accomplishment, and a supportive social environment. The psychological well-being of homemakers refers to the mental health and emotional state of individuals primarily responsible for managing household duties and caring for family members. For homemakers, psychological well-being can be influenced by various factors such as the balance between work and family responsibilities, social support networks, marital satisfaction, financial stressors, and societal expectations regarding gender roles. Understanding the psychological well-being of homemakers is essential for addressing potential challenges they may face, promoting their mental health, and enhancing their overall quality of life.

However, the continuous demands of caregiving and household responsibilities can sometimes lead to stress and burnout, affecting their psychological well-being. Thus, it's crucial for home makers to prioritize self-care, set boundaries, and seek support from their partners or community resources to maintain a healthy balance. In Kerala, home makers face unique socio-cultural dynamics that influence their psychological well-being. The state's high literacy rate and emphasis on education have led to increased aspirations among women, yet traditional gender norms often dictate that their primary duty remains domestic care, potentially creating conflicts between personal ambitions and familial obligations. Furthermore, the absence of formal recognition and support for their contributions often exacerbates feelings of isolation and undervaluation. By exploring the psychological well-being of homemakers in Kerala, this study will delve into various dimensions of well-being, including emotional resilience, stress management, social support networks, and self-esteem.

REVIEW OF LITERATURE

Teli (2023) conducted a comparative study on the psychological well-being of homemakers in urban and rural areas in India. Despite the traditional division of household responsibilities along gender lines, the study found no significant difference in overall psychological well-being between urban and rural homemakers. However, differences were noted in specific subscales of psychological well-being.

JOB STRESS AMONG WOMEN EMPLOYEES IN IT COMPANIES

Mr. Jeshurun Michael, II BSW, Department of SocialWork, Patrician College of Arts and Science Ms. Samoodha, II BSW, Department of SocialWork, Patrician College of Arts and Science Dr.Meena V, Assistant Professor, Department of SocialWork, Patrician College of Arts and Science,

ABSTRACT

This paper is about job stress experienced by women working in IT companies. This paper explores the unique stressors these women encounter, their coping mechanisms, and the impact of organizational culture on their well-being. This paper underscores the need for IT companies to foster more inclusive and supportive work environments to mitigate job stress and enhance productivity and job satisfaction among female employees. These stressors often lead to burnout, reduced job satisfaction, and lower retention rates. Nonetheless, many women adopt effective coping strategies such as seeking support from peers, engaging in continuous professional development, and utilizing flexible work arrangements when available. The paper highlights the critical need for IT companies to implement inclusive policies, promote gender equality, and establish support systems to alleviate stress and create a more conductive work environment.

Keyword: Job Stress, Women, IT Companies, Employees

INTRODUCTION

In the rapidly evolving landscape of the information technology (IT) industry, the issue of job stress has become increasingly prominent, particularly among women. As IT companies drive innovation and growth, they often demand high levels of performance and adaptability from their employees. However, the unique challenges faced by women in this male-dominated field can exacerbate stress levels, impacting their professional and personal lives. Historically, the tech industry has struggled with gender diversity, leading to environments where women often encounter gender bias, unequal opportunities for career advancement, and work-life imbalance. These stressors are compounded by the high-pressure nature of IT jobs, which frequently involve long hours, tight deadlines, and the need for continuous skill updating to keep pace with technological advancements. Understanding the specific sources of job stress for women in IT is crucial, as chronic stress can lead to significant mental health issues, decreased job satisfaction, and higher turnover rates. Moreover, the strategies women employ to cope with these stressors, and the role of organizational culture in either mitigating or exacerbating stress, are critical areas of inquiry. This paper aims to explore the multifaceted nature of job stress among women in IT companies, examining the underlying causes, the coping mechanisms and the impact of corporate culture on their overall well-being. By shedding light on these aspects, the research seeks to inform policies and practices that can foster a more inclusive and supportive work environment, ultimately benefiting both employee and Organisation. The IT industry is a cornerstone of the modern economy, driving innovation and technological advancement across various sectors. However, this dynamic field also presents significant challenges, particularly for women. Despite efforts to promote gender diversity and inclusion, women in IT continue to face a range of stressors that can hinder their career progression and affect their mental health and well-being.

One of the primary stressors is gender bias, which manifests in various forms such as unequal pay, limited opportunities for leadership roles, and pervasive stereotypes that question women's technical competence. These biases can create a hostile work environment, leading to feelings of isolation and decreased job satisfaction. Additionally, the work-life imbalance is a significant concern, as many women juggle demanding professional responsibilities with family and caregiving duties. This imbalance can lead to chronic stress and burnout, further exacerbated by the industry's often inflexible working hours and high expectations. The rapid pace of technological change also places considerable pressure

IS CORPORATE SOCIAL RESPONSIBILITY BENEFITING THE COMMUNITY

Mr. Jerome Kumar. A, MSW, Department of Social work, Patrician College of Arts and Science
Mr. Justus Wallis. C J, Assistant Professor, Department of Social work, Patrician College of Arts and Science
Mr. Yogith J. P, MSW, Department of Social work, Patrician College of Arts and Science

ABSTRACT

Corporate Social Responsibility (CSR) has become a significant focus for companies worldwide, with many investing in initiatives aimed at benefiting communities. This paper explores whether CSR genuinely benefits communities or primarily serves as a public relations tool. It examines various CSR strategies, their implementation, and their tangible impacts on local communities through case studies of Ashok Leyland, Tata Consultancy Services (TCS), TVS Motor Company, Ramco Cements, and Indian Bank. The analysis aims to provide a balanced view of CSR's effectiveness in fostering sustainable community development.

Keywords: Corporate Social Responsibility (CSR), Community Benefit, CSR Impact, Financial Investments, Social Welfare, Environmental Sustainability.

INTRODUCTION:

Corporate Social Responsibility (CSR) refers to a business model in which companies integrate social and environmental concerns into their operations and interactions with stakeholders. The concept has gained traction as businesses recognize their role in contributing to societal well-being beyond generating profits. However, the question arises whether CSR truly benefits communities or is more about enhancing corporate image.

CSR FUNDING COMPANIES IN TAMIL NADU

There are several CSR funding companies in Tamil Nadu that are making a difference in their respective fields. Some of the top CSR funding companies in Tamil Nadu are:

Ashok Leyland -N V Balachander

Ashok Leyland is a leading commercial vehicle manufacturer in India, and it is also one of the top CSR funding companies in Tamil Nadu. The company is committed to promoting education, healthcare, and environmental sustainability. They have implemented several initiatives such as setting up schools, providing healthcare facilities, and promoting eco-friendly practices. Ashok Leyland has set up several schools in rural areas, providing quality education to children who would otherwise have limited access to education.

The budget of Ashok Leyland while the company's mandated CSR expenditure amount 2 per cent of annual profit was Rs.146.11 crore, its expenditure was Rs.236.3 crore. Its annual report shows that the company spent a large portion of money Rs.204.73 crore on education and skill development.

The company's "Road to School" program has significantly improved educational outcomes in rural areas. Data from these programs show increased literacy rates and school attendance. Their health camps provide essential medical services to underprivileged communities, contributing to better health outcomes. For example, health camps conducted in Tamil Nadu villages saw a 30% reduction in common ailments and improved overall health indicators in the community.

ADVANCING CSR THROUGH GENDER EQUITY

ABSTRACT

Our goal is to create a workplace where every individual feels valued, respected, and supported. We believe that by promoting gender equity, we cannot only create a more diverse and inclusive workplace but also drive business results and improve our overall performance. This report provides a snapshot of our progress and highlights the work we still need to do to achieve our goals. We look forward to continuing our journey towards a more equitable and inclusive workplace

Keywords: Corporate Social Responsibility, Community Benefit, CSR Impact, Education and Training Girls education, Vocational Training.

INTRODUCTION

Promotes Diversity and Inclusion: Gender equity ensures that all employees, regardless of gender, have equal opportunities to contribute to the organization's success.

Boosts Productivity: A diverse and inclusive workforce can lead to increased productivity, creativity, and innovation.

Enhances Reputation: Companies that prioritize gender equity are more likely to be seen as socially responsible and attractive to customers, investors, and talent.

Supports Economic Growth: Closing the gender gap can lead to significant economic benefits, as women's participation in the workforce can increase GDP and stimulate economic growth. CSR can be a valuable tool to addressing gender inequality in workplaces. Traditionally, gender inequality in the workplace has contributed to many problems such as, segregation, wage discrimination and the impeding of female career progression, despite education and qualifications. Workplace gender equality is a core pillar of CSR with companies nowadays increasingly addressing it within their work agendas. These programmes focus mostly on the experiences of women, giving particular attention to their rights, equal pay, sexual harassment and discrimination.

Companies using CSR to achieve gender equality in their workplaces:

Salesforce: In 2015, the company started to audit its pay practices to eliminate any gender discrepancies. In March of the same year, the company announced that around 6% of its 17,000 employees were impacted and that it had spent \$3 million to bring the underpaid workers (both men and women) to parity with their peers.

Deloitte: Announced its new 16-week family leave benefit in September 2017, being praised for its forward-thinking with a policy that will help the company recruit and retain talent.

Hilton Worldwide: In 2015, the company announced its new policy, offering 2-10 weeks of paid parental leave to all staff, from hotel employees to corporate staff, along with those working part-time and hourly.

Macy's: CEO and Chairman Terry Lung Ren has been very firm-standing in his desire to have his retailer reflect those that shop there. Thus, half of the 12 board directors are women; two members are African-American, one is Asian-American and one is Hispanic.

A STUDY ON THE BENEFITS AND EFFICACY OF SOFT SKILLS CLASSES

Neeraja AI, Students of II MSW, Department of Social Work Patrician College of Arts and Science findneeraja.ai@gmail.com,

AMONG STUDENTS AT PATRICIAN COLLEGE OF ARTS AND SCIENCE

Geoffrey Leo A, Students of II MSW, Department of Social Work Patrician College of Arts and Science geoffreylco09112001@gmail.com,

Michael Britto A, Students of Il MSW, Department of Social Work Patrician College of Arts and Science amichaelbritto.04@gmail.com,

Raichel Diana, Assistant Professor, Department. of Social Work Patrician College of Arts and Science raicheldiana@patriciancollege.ac.in.

ABSTRACT

This research paper presents an in-depth study on the benefits and efficacy of soft skills classes among students at Patrician College of Arts and Science, located in Kotturpuram, Chennai. The primary aim of this study is to investigate the impact of soft skills training on college students, with a particular focus on the specific advantages gained by students who participate in these classes.

As educational institutions aim to equip students not only with academic knowledge but also with essential life skills, the findings of this research can guide curriculum developers, educators, and policymakers in tailoring programs to better meet the holistic needs of college students. Furthermore, the insights gained from this study may contribute to the optimization of life skills training initiatives, fostering a more comprehensive and impactful educational experience. By utilizing quantitative methods, the research aims to quantify the impact of life skills training, providing statistical evidence to support or refute hypotheses related to the benefits and efficacy of such programs among college students. The research employed a quantitative research design, utilizing a descriptive study approach. This approach allowed for the collection of quantitative data to measure changes in students' soft skills levels. The study used simple random sampling to select a sample of 120 respondents from 12 departments at Patrician College. This sampling technique ensured an unbiased representation of the student population. In conclusion, this research underscores the importance of soft skills training in higher education, demonstrating its efficacy in enhancing students' personal and professional development. The findings of this study have significant implications for educators, policymakers, and higher education institutions, emphasizing the need to incorporate soft skills training into the curriculum.

INTRODUCTION

IMPORTANCE OF SOFT SKILLS

While having a college diploma does not guarantee that a person has the competencies to be successful in the work environment, nor guarantee a job, a degree is still important to employers. However, employers are looking for people who bring hard skills as well as soft skills, many scholars focused on the importance of preparing students with the theoretical

BEYOND GRADES: EXPLORING THE COMPREHENSIVE IMPACT OF EDUCATION SYSTEMS ON STUDENT DEVELOPMENT IN RELATION WITH EMPLOYMENT

Samoodha II, BSW, Department of SocialWork, Patrician College of Arts and Science

Dr.Meena V, Assistant Professor, Department of Social Work, Patrician College of Arts and Science, Adyar, Chennai

ABSTRACT

Education system impacts a student's life and has it's merits and demerits. This Paper also focuses on how grading system and pressure from parents, society and coaching industry affects a student's holistic development and the mental health related issues because of the current education system. It presents an analysis of the crucial role played by education systems in shaping the holistic development of students and their subsequent transition into the workforce. The contemporary education landscape not only focuses on imparting academic knowledge but also emphasizes the cultivation of essential skills and competencies required for success in the professional realm. This paper explores the multifaceted ways in which education systems influence student development and employability. Firstly, the abstract examines the pedagogical approaches and curriculum frameworks adopted by education systems to foster a comprehensive learning experience. Beyond traditional academic subjects, modern education emphasizes the development of critical thinking, communication, collaboration, and problem-solving skills, which are essential for thriving in diverse employment settings. , the abstract delves into the role of extracurricular activities, vocational training, and internships in supplementing academic learning and providing students with real-world exposure. These experiential learning opportunities not only enhance students' practical skills but also enable them to explore various career pathways and make informed decisions about their future. In conclusion, this abstract underscores the integral relationship between education systems, student development, and employment outcomes. By equipping students with a diverse skill set, relevant knowledge, and practical experiences, education systems contribute to the cultivation of a capable and adaptable workforce that drives economic growth and societal progress.

Keyword: Education. Student development, employment

INTRODUCTION

Education is transforming of knowledge, skills, character traits, values, habits and overall development of a child's life so that they are equipped to deal with problems and have self-confidence to go out in world and be able to survive. Education serves different purposes in shaping individuals. It's primary goal includes fostering intellectual growth, promoting critical thinking, preparing individuals for workforce and fostering personal development and critizenship In this article we can discuss how far the Education system serves its purpose. Its merits and demerits. Education has a profound impact on employment. Generally, higher levels of education correlate with higher employment rates and better job opportunities. Education equips individuals with the necessary skills, knowledge, and qualifications sought after by employers. Additionally, it enhances critical thinking, problem-solving abilities, and adaptability, all of which are crucial in the modern job market. Moreover, education often opens doors to higher-paying positions and career advancement opportunities. However, the specific impact can vary depending on factors such as the quality of education, the field of study, and regional economic conditions.

A STUDY ON EFFECTIVENESS OF GRIEVANCE REDRESSAL MECHANISM FOREMPLOYEES IN PRIVATE SECTORS IN CHENNAI

Mr. Thiyagarajan P.A., Il MSW, Department of Social Work, Patrician college of (Arts & Science)

Mr. Dominic. B, Assistant Professor, Department of Social Work, Patrician College of (Arts & Science)

ABSTRACT

This study examines the effectiveness of grievance redressal mechanisms for employees in private sectors in Chennai. Grievance redressal mechanisms are essential components of organizational management, providing avenues for employees to address concerns and grievances. However, their effectiveness can vary significantly, impacting employee satisfaction, retention, and organizational harmony. Through a mixed-methods approach including surveys, interviews, and case studies, this research assesses the awareness, utilization, efficiency, and satisfaction levels of existing grievance redressal mechanisms. The study aims to identify common types of grievances faced by employees, evaluate the responsiveness of current processes, and propose recommendations for enhancing effectiveness. By shedding light on the strengths and weaknesses of grievance redressal mechanisms in private sector organizations in Chennai, this research contributes to the improvement of employee relations and organizational management practices.

Keywords: Employees in private sectors, (GRM) Grievance Redressal Mechanism, Reason, Redress & Resolve.

INTRODUCTION

DEFINITION OF GRIEVANCE REDRESSAL

Grievance Redress Mechanism is part and parcel of the machinery of any administration. No administration can claim to be accountable, responsive and user-friendly unless it has established an efficient and effective grievance redress mechanism.

GRIEVANCE HANDLING MECHANISM (GHM)

The GHM, can be addressed as a Systematic procedure that provides a clear and transparent framework for addressing grievances related to the process in workplace. Due to the diversity of human beings, workplace conflicts will unavoidably arise as a consequence of employee grievances coming from day-to-day working interactions in a firm. It must be expressed by theindividual and brought to the attention of management and the organization. When grievancesgo unresolved, they turn into group conflicts.

STAGES IN GRIEVANCE HANDLING PROCEDURE

Grievance handling is a crucial aspect of employee relations, and it involves several stages thatorganizations must follow to resolve grievances effectively. The following are some more detailed content on each stage of the grievance handling process:

Grievance Receipt: This is the initial stage where the employee raises the grievance with theappropriate authority or department. The organization must have a formal process in place foremployees to submit grievances, such as a complaint box, email, or a dedicated grievance redressal portal. The organization should also ensure that employees are aware of the process for submitting grievances.

Comprehensive Analysis of Occupational Stress among Information Technology Employees in Chennai using k-means Clustering and Canonical Discriminant Analysis

Rukmani B 1, Kalaiarasi N 2, Joel Preethi F 3, and Manimannan G. 4

ABSTRACT

0.0.1 This research paper explore occupational stress among Information Technology (IT) employees in Chennai by employing k-means Clustering and Canonical Discriminant Analysis (CDA) on data collected from 421 respondents across eleven IT industries. k-means Clustering was utilized to segment employees into distinct stress groups based on parameters such as Organization Climate, Job Satisfaction, Physical Health, and Sources of Work Pressure. The clustering process identified three primary stress levels are High, Medium and Low, across these dimensions, revealing significant variations in stress patterns. CDA was then applied to validate these groupings, achieving high classification accuracy and confirming the distinctiveness of the clusters. The study provides a comprehensive overview of stress dynamics within the IT sector, highlighting variations in stress levels and their implications for employee well-being. This integrated approach of clustering and discriminant analysis offers valuable insights for designing targeted interventions to manage and mitigate occupational stress.

Keywords: k-means Clustering, Canonical Discriminant Analysis, Occupational Stress, IT Employees and Job satisfaction

A STUDY ON WORK LIFE BALANCE OF WOMEN EMPLOYEES IN ALL SECTORS WITH REFERENCES TO CHENNAI DISTRICT, TAMILNADU

Ms.F.JOEL PREETHI

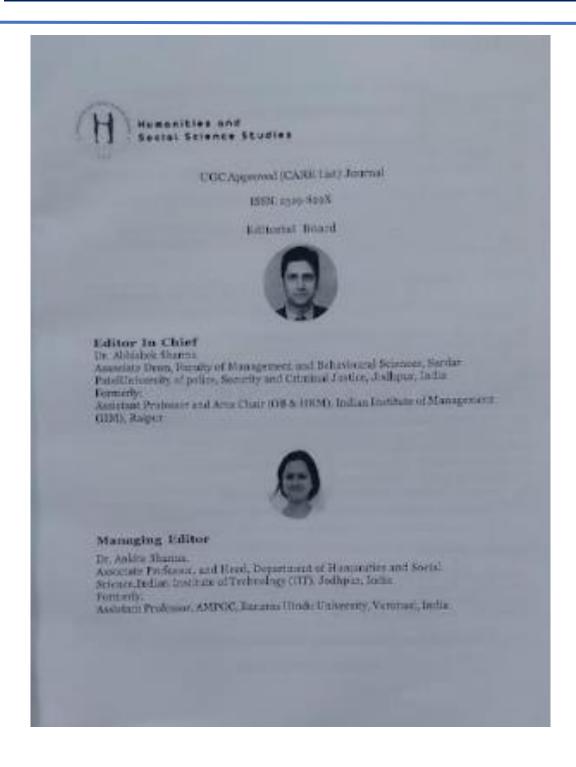

Research Scholar, Patrician College of Arts and Science

Abstract

The basic problem of women employees is being a woman in many developing countries marriage is treated as the only career for women. Despite the constitutional and legal equality, women suffer from made reservations. This attitude of reservation creates problems at all level like family support, training, licensing, Banking and marketing. In recent decades most of the women are seeking work to financially support their families. Because of changing surrounding (or) environment and growing necessary needs of modern society. Women's greatest struggle is balancing the responsibilities of family and work. Career desires, Work- family conflict and Family-work conflict, Child care with Work- life Balance (WLF) and its approach are all pointed out as a few reasons to study work life balance in women Employees. Women's participation in income — generating activities allows them to meet their domestic demands to a large degree.

Key Word: Work life balance, women, equality, and family work conflict
