UNIQUE INITIATIVES BY DEPARTMENT

Department of English:

Literary Exchange Program: Collaborating with international universities, the Department of English facilitates student and faculty exchanges to foster cross-cultural learning and enhance language proficiency.

Literary Salon Series: Organizing regular literary salons where students and faculty engage in discussions, debates, and presentations on contemporary literary trends and themes.

Department of Mathematics:

Mathematics Outreach Program: Collaborating with local schools, the Department of Mathematics conducts outreach programs to promote mathematical literacy among school children through interactive workshops and competitions.

Math Café: Hosting weekly Math Café sessions where students can gather to solve challenging math problems, discuss mathematical concepts, and receive peer support.

Department of Social Work:

Community Outreach Initiatives: Engaging students in various community service projects such as literacy campaigns, health awareness programs, and environmental clean-up drives to address social issues and promote community development.

Fieldwork Immersion Program: Providing students with hands-on experience through fieldwork placements in NGOs, government agencies, and grassroots organizations to apply theoretical knowledge to real-world social work practice.

Department of Commerce:

Entrepreneurship Development Program: Offering specialized courses and workshops in entrepreneurship to equip students with the skills and knowledge needed to start and manage their own businesses.

Industry Interface Seminars: Organizing seminars and guest lectures featuring industry experts and successful entrepreneurs to provide students with insights into current trends and challenges in the business world.

Department of Commerce Computer Applications:

Techpreneurship Bootcamp: Hosting boot camps and hackathons where students combine their knowledge of commerce and computer applications to develop innovative tech-driven solutions for business challenges.

E-commerce Simulation Project: Engaging students in a hands-on simulation project where they create and manage their own e-commerce websites, gaining practical experience in online business operations.

Department of Physical Education:

Fitness Challenge Programs: Organizing fitness challenges and competitions to promote physical activity and healthy lifestyle habits among students, faculty, and staff.

Department of Electronics Media:

Media Literacy Campaigns: Conducting media literacy workshops and campaigns to raise awareness among students about media ethics, critical thinking, and responsible media consumption.

Student-Run Media Productions: Empowering students to produce their own media content, including short films, documentaries, and podcasts, which are showcased through campus screenings and online platforms.

Department of Computer Science:

Coding Competitions: Hosting coding competitions and hackathons to encourage students to hone their programming skills and problem-solving abilities.

Open Source Projects: Collaborating with industry partners and open-source communities to involve students in contributing to real-world software projects, fostering collaboration and innovation.

Department of Business Administration:

Case Study Competitions: Organizing case study competitions where students analyze real-world business scenarios and present strategic solutions to industry professionals and academics.

Corporate Mentorship Program: Establishing partnerships with corporate organizations to provide students with mentorship opportunities, industry insights, and internship placements.

Department of Psychology:

Psychological Well-being Workshops: Offering workshops and seminars on mental health, stress management, and self-care to promote psychological well-being among students and faculty.

Counselling Services: Providing counselling services and support groups for students facing academic, personal, or emotional challenges, fostering a supportive and inclusive campus community.
